

VALUATION

Changing business dynamics and regulatory requirements make it imperative for companies to seek valuations for various reasons. While at times the need arises out of transactions, mergers, acquisitions, negotiations or internal management decisions, valuation is also required for statutory reporting of inbound and outbound investments, financial reporting under Ind AS, benchmarking studies, issuance of ESOPs etc.

We at Infiven Private Limited, have an experienced and focussed team that provides valuation related services both for commercial and business reasons and for statutory purposes. Business and commercial reasons may vary from client to client and include scenarios such as valuation for acquisitions, investments, restructuring, intangibles, non-compete, purchase price allocation, arbitration, family settlement and disputes, ESOP etc. Statutes covered include Companies Act, FEMA, Income Tax, SEBI including certification required from a Registered Valuer (which we undertake through our affiliate Company).

Our experience in tax, regulatory and business advisory helps us better understand the valuation needs of our clients and uniquely positions us to provide our insights to various stakeholders. We are a trusted business advisor and thus, greater reliance is placed by the stakeholders on the valuations issued by us.
